

The Desire project experiments with creating sustainable, attractive, and inclusive urban spaces. Powered by knowledge from eight urban transformation projects across Europe, the aim is to create a new vision for how we can build and live based on cohesion and equality.

Desire is a New European Bauhaus lighthouse project.

circular society

Creating Social and Inclusive Housing

Gadehavegaard in Høje-Taastrup, Denmark

A large housing area is undergoing a major transformation that will open up the area to the outside world and bring nature closer to residents.

Ziepju in Riga, Latvia

Socially vulnerable citizens are involved in a green renovation plan for a social housing block.

Wildemanbuurt in Amsterdam, Holland

A social housing area with great cultural diversity is undergoing an urban renewal scheme in collaboration with the local residents.

Transforming through Symbiotic Relationships

Kalundborg Circular Campus, Denmark

A new architectural education program has been initiated, and a project is underway to explore how the new school can be integrated into the city sustainably and inclusively.

MIND in Milan, Italy

Companies in a new innovation district, MIND, are cooperating on a symbiotic circular community, while creating a green and inclusive public space.

Reconciling Cities with Nature

The Garden Caretaker in Herlev, Denmark

A series of visiting artists have moved into a construction site to explore how you can understand a place before it is developed.

BTC City in Ljubljana, Slovenia

A hybrid shopping center is being transformed into a regionally leading green, climate-resilient, and attractive business city.

Cascina Falchera in Turin, Italy

An urban farm with educational activities is part of an innovative urban renewal initiative to support the local community.
